

Figure 5. M2 phase map and flip boundaries

SRHT/Hadamard pairwise dominates only in above-floor strict equal-frame cells; floor cells are excluded from winner claims.

Status: compact-protocol complete; final artwork draft

Prompt-range M2 phase maps and observed flip-boundary fits after the rel_mse<0.5 above-floor gate. Reference-frame methods are shown separately because they spend extra physical frames; grey map cells are reconstruction-floor cells.
